INTRODUCTION

- Thriam group of industries commenced its journey in 1989 as an original equipment manufacturing company.
- Becoming a manufacturing hub for electrical products was our stepping stone towards success.
- Completing three decades in engineering, Thriam has achieved the goal of becoming a one-stop multilevel engineering solution provider.

COMPANIES

CUSTOMER PAIN?

- Lack of single source destination for engineering services
- Managing multiple vendors
- Multi vendor quality management 
- Managing multiple SKUs and inventory
- Scarce of resource with experience
- Non availability of suitable technology

CUSTOMER CENTRICITY

Compression moulding

Compression moulding with 65 Ton to 300Ton capacity.

Injection moulding

Injection moulding with 80 Ton to 180 Ton capacity.

Tool and die making

Machining facility with design capabilities. In house trial facility.

Ship building materials

Manufacturing, sourcing & exporting, ship building and repair materials.

Product assembly

Processing and designing a wide range of product assembly and sub-assembly works.

Product development

Product oriented end to end development and design facility.

CUSTOMER CENTRICITY

SMC - DMC compounds

SMC and DMC compound manufacturing according to customer specification.

Design services

Service for all your product and mould designing needs.

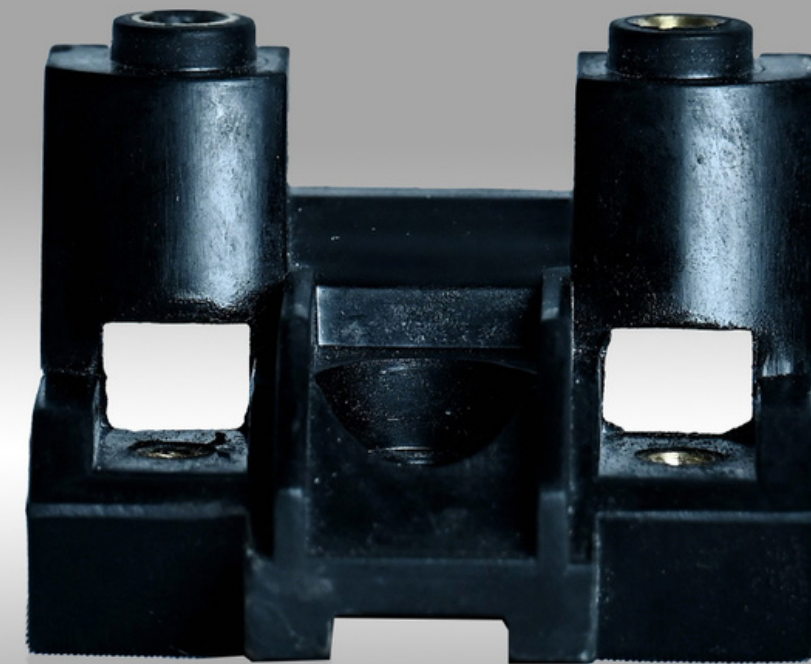

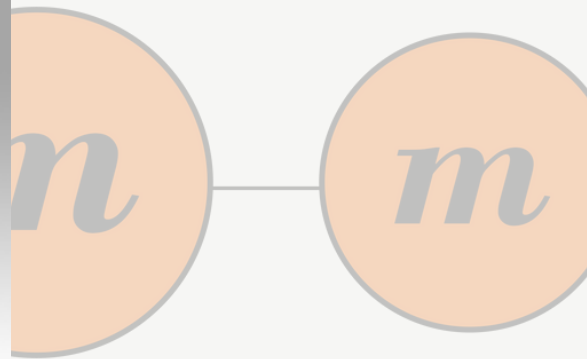

Electrical insulators

All types of conical, strip and T insulators to suit all your electrical needs.

Traub components

Capacity ranging Dia 10 to Dia 60 mm precision turned components.
